

AUTOCLOSE®
expect the unexpected

What can he expect?

This debate has been going on between the sexes for generations. Should the seat be left up or down? With AutoClose® by Pressalit you don't have to worry about closing the seat because it closes nicely by itself after use – completely automatically.

Unexpected

What can she expect?

Prepare yourself to be surprised. Now the seat will always be closed when you need to use the toilet. AutoClose® by Pressalit has a smart function that not only closes the seat automatically after use.

It also ends the debate about whether the seat should be left up or down – and it brings harmony back into the bathroom.

harmony

AutoClose® by Pressalit
*is an intelligent function that makes the toilet seat
close automatically after use*

The intelligent toilet seat

Modern Art with AutoClose® is nothing less than a worldwide sensation. The seat is equipped with an intelligent sensor that continuously registers whether a user is present. As long as the sensor registers a user, the cover will remain open. If you want the cover to stay open for a longer time, for instance when cleaning, all you have to do is open the cover and step out of the sensor's reach. The sensor then ensures that the seat remains open for approx. 5 minutes. Say goodbye to slamming toilet seats and welcome to our intelligent Modern Art with AutoClose®.

- The sensor registers the user
- As a minimum, the cover will remain open for 1½ minute
- The infrared sensor functions independently regardless of the amount of light in the room
- The seat is easy to mount

Please note that the laser beam does not actually light up.
This is just to illustrate the sensor in AutoClose®.

Quiet luxury

It is a pure pleasure to experience a seat that elegantly closes all by itself while you are busy washing your hands. The inspiration for the seat's elegant sweeping form is taken from the waves of the sea and is groundbreaking for the category. Furthermore, Modern Art with AutoClose® is equipped with an automatic damping device, i.e. in addition to closing automatically after use, the seat also lands quietly on the toilet pan.

Open up to an ...

unexpected finish

00:00:15

- AutoClose® offers you two ways to close the seat – seat and cover simultaneously or only the cover
- The AutoClose® function means that the seat will not close immediately, giving you the opportunity to check that the toilet has flushed properly
- Modern Art with AutoClose® has a practical handle integrated into the seat and cover
- Modern Art with AutoClose® is designed by the famous Danish designer Knud Holscher
- A minimalist and beautiful design in colour ingrained duro plast
- Quick-release eases removal of seat for easy and quick cleaning
